

The Flower Fold

Place the napkin flat on a clean surface with the embroidered motif facing downward.

Lift the bottom edge upward, folding it approximately one quarter of the way toward the center.

Fold the top edge downward, bringing it neatly over the previous fold until the edge aligns with the bottom of the napkin.

Fold the right side inward toward the center, creating a clean vertical edge.

Fold the left side slightly inward, overlapping toward the center.

Fold the left side inward once more, aligning both sides so the edges meet evenly and the fold holds its structure.

Make final adjustments so the embroidered detail appears centered in the lower portion of the napkin, allowing the motif to be elegantly revealed.
