

The Zero Bond Fold

Lay the napkin flat on the table with the embroidery facing down, positioned in the middle of the left side.

Fold the bottom of the napkin upward so it covers roughly one third of the napkin's height.

Fold the top of the napkin downward so it overlaps the fold you just made, meeting around the center.

Fold the left side of the napkin inward approximately one inch to create a clean vertical edge.

Fold the right side of the napkin inward approximately one inch to mirror the left side.

Fold the napkin from the left side toward the right, almost halfway across, leaving a visible strip of the overlapping fold on the right so it is not completely covered.
